

onSpa®

Quick Reference Guide

Introduction:

Congratulations on purchasing the On-Spa system. You now have the most advanced control system available for Spas on the market. This quick-reference card will give you instructions on how to set up your iphone, ipod touch, or ipad to operate the spa.

Overview:

OnSpa lets you use your iphone, ipod touch, or ipad to control your spa. Put it in the waterproof case and you have the most advanced spa remote available. From the house you can turn the lights on, check and adjust the temperature, check and adjust filtration settings, make sure there are no error codes etc...

Spa Functions: The spa functions are controlled using Wi-Fi signals. The spa creates its own wifi network (no internet connection is needed). When you join the Wi-Fi network of the spa and launch the app you will be able to control the functions of the spa.

Streaming Music: Streaming music is done using Bluetooth. Using any Bluetooth enabled device join the spa's Bluetooth and begin streaming.

Downloading the App:

To download the app make sure you are connected to the Internet and launch the Apple "App Store" app

From the main screen find and click on the "App Store" icon

Click on "Search" on the bottom tab and type in "Arctic Spas", the app will appear

Click the word "Free", then "Install" to begin downloading the free app. Its that easy!

Connecting to the Spa's Wi-fi Network:

In order to control the spa using the app you must first be connected to the spa's wi-fi network

From the main screen
Press the "Settings" icon

Press the "Wi-Fi" icon

Look for your spas wifi network. It will be named Arctic Spas XXXXX. Press to join

You will be asked for a password. The factory default is "globalspa"

If done correctly there will be a check mark next to "Arctic Spas". To verify settings press the small blue arrow next to Arctic

Verify the IP address is set to DHCP and that you have been given an IP address of 169.254.3.1XX

Return to the main screen and locate the app you have downloaded. Press the icon

Wait for the app to load

You should now see the main screen with the temperature and pump/light controls. You are now connected to your spa wirelessly!

Connecting the Bluetooth:

Note: The amplifier of your spa will be powered up for 2 hours after any user function is pressed.

In order to stream music you will have to pair your device with the spa's Bluetooth receiver:

From the main screen
Press the "Settings" Icon

Press the "General" icon

Press the "Bluetooth" icon

Turn Bluetooth "ON" (if it isn't already). Search for B-228BT (this is the spa) and press to join.

If you have never synced it will ask you for a password, it is "0000" (four zero's)

Wait in this screen and verify that you now see "connected" beside B-228BT.

Go back to the main screen and press the "iPod" icon

Start playing music, it should now be connected and playing through your spa's sound system. If not push the source icon

Verify that your audio source is set to play through the B-228BT and not the device itself

You can now go back to the spa app. To change you music without leaving the spa app simply double click the main button

The taskbar will pop-up, slide your finger across it from left to right. You will be able to change the songs, and play or pause the music

Simply press anywhere on the spa app and you will be back to controlling your spa.
